Event Wrap Up

Another big Thank You goes out to all who made the Palmer Home Ringer Tournament a success! We feel that we have set the bar very high for golf events with this one and we could not have done it without you.

After all is said and done we were able to raise \$4,072 for Palmer Home for Children and \$2,900 for the Elm Lake Golf Association.

There was an ELGA meeting held on August 25th in the clubhouse and the members voted on how to spend some of the raised dollars. The ELGA has voted to spend \$1500 on getting 3 pallets of sod to replace on the bad areas of the greens. We will also use some of the sod to build a nursery green so we can have sod to use for future repairs. The ELGA also voted to hold a ELGA Members Only event on October 18th. Further details on the event will follow.

The Roast n Boast Scramble is schedule for Sunday, September 13th at 1:00pm. The event is

getting full with 17 teams already. If you are thinking about playing please get signed up right away.

Columbus Christian Academy is hosting a golf event on Saturday, October 3rd at 9am. Further details and signup to follow.

Golden Triangle Homebuilders Association has teamed up with Habitat for Humanity to host a golf scramble on Friday, October 9th at 1pm. Further details and signup to follow.

Groups with 4 players have priority on the golf course. Please understand that groups of 1 or 2, although faster, **DO NOT** have priority on the golf course.

Thank You

Thank you to the Elm Lake Ladies who continue to maintain the flower beds in front of the clubhouse. Your efforts are appreciated by all golfers and homeowners every day.

From the Course

A friendly reminder to keep all golf cars 30 yards away from tees and greens at ALL times. There is no reason to have your cart off of the path around the tees and greens. Please keep all 4 tires on the cart path as much as possible. All par 3's play as cart path only every day of the year. Thank you for understanding.

With cooler temperatures on the way we will slowly begin to raise the height of the greens. We need to increase the height of the grass by 0.30 before the first frost. This is to protect the grass and allow it to store as much nutrients as possible for the winter. With the sod coming to fill in the remained of the green spots we will be able to have even smoother, faster and more consistent greens next season.
